

Name:	Brianna [REDACTED]
Instructor:	Samuel Chukwuemeka
Objective:	To convert a measurement from one unit to another unit.
Measurement:	Mass
1 st Given Unit:	Customary Unit (Ounce)
To Convert to:	Metric Unit (Gram)
2nd Given Unit:	Metric Unit (Gram)
To Convert to:	Customary Unit (Ounce)
Container Used:	Chobani Greek Vanilla Yogurt

Convert 32oz to g

From the given tables:

$$1 \text{ lb} = 16 \text{ oz}$$

$$1 \text{ lb} = 453.59237 \text{ g}$$

$$\rightarrow 16 \text{ oz} = 453.59237 \text{ g}$$

Unity Fraction Method:

Let q = mass of 32oz in g

$$32 \text{ oz} * \frac{1 \text{ lb}}{16 \text{ oz}} * \frac{453.59237 \text{ g}}{1 \text{ lb}} = q$$

$$q = \frac{32 * 453.59237 * 1}{16 * 1}$$

$$q = \frac{14514.95584}{16}$$

$$q = 907.18474 \text{ g}$$

$$q \approx 907 \text{ g}$$

This is achieved by rounding to the nearest integer.

This confirms the value on the container.

Convert $907g$ to oz

From the given tables:

$$1lb = 16 oz$$

$$453.59237g = 1lb$$

$$16 oz = 453.59237g$$

Unity Fraction Method:

Let q = mass of $907g$ in oz

$$907g * \frac{1lb}{453.59237g} * \frac{16oz}{1lb} = q$$

$$q = \frac{907 * 1 * 16}{453.5237 * 1}$$

$$q = \frac{14512}{453.59237}$$

$$q = 31.99348349oz$$

$$q \approx 32oz$$

This is achieved by rounding to the nearest integer.

This confirms the value on the container.
