

Correa 1

Name:	Correa
Instructor:	Samuel Chukwuemeka
Objective:	To convert measurement from one unit to another unit.
Measurement:	Mass
1 st Unit:	Customary Unit (Ounce)
To convert to:	Metric Unit (Gram)
2 nd Unit:	Customary Unit (Gram)
To convert to:	Metric Unit (Ounce)
Container:	Reese's Take 5 Candy Bar (Please see bottom).

First Convert 1.5 oz to g

Given Tables:

$$1lb = 16oz$$

$$1lb = 453.59237 g$$

$$16oz = 453.59237 g$$

Correa 2

Unity Fraction Method:

$$1.5oz \times \frac{g}{oz}$$

$$1.5oz \times \frac{453.59237g}{16oz}$$

$$\frac{1.5oz}{1} \times \frac{453.59237g}{16oz}$$

$$\frac{680.388555g}{16}$$

$$= 42.52428469g$$

Rounded down to the nearest integer to get the value on the container.

$$= 42g$$

Second Convert 42g to oz.

Given Tables:

$$1lb = 16oz.$$

$$1lb = 453.59237g$$

$$16oz = 453.59237g$$

Correa 3

Unity Fraction Method:

$$42g \times \frac{oz}{g}$$

$$42g \times \frac{16oz}{453.59237g}$$

$$\frac{42g}{1} \times \frac{16oz}{453.59237g}$$

$$\frac{672}{453.59237}$$

$$= 1.481506402oz.$$

Rounded to the nearest tenth to get the value on the container.

$$= 1.5 oz.$$
